

How to Run the Project

Step-by-Step Instructions and Login Credentials

Follow the steps below in order on a Windows development PC.

Step 1 - Install the required software

Install Visual Studio 2022 with ASP.NET and web development workload, .NET 8 SDK, SQL Server LocalDB (or SQL Server), Git, Visual Studio Code, and the Live Server extension.

Step 2 - Clone the project and switch to develop

```
git clone https://github.com/rvabi/EventParkingReservationSystem.git
cd EventParkingReservationSystem
git switch develop
git pull origin develop
```

Step 3 - Open the solution

Open the solution file EventParkingReservationSystem\EventParkingReservationSystem.sln in Visual Studio 2022.

Step 4 - Configure the local JWT key

Open Command Prompt or Terminal in EventParkingReservationSystem\EventParking.Api and set a development JWT signing key.

```
dotnet user-secrets set "Jwt:Key" "EventParking-Development-Jwt-Key-2026-ChangeMe"
```

Step 5 - Restore and build the solution

```
dotnet restore EventParkingReservationSystem.sln
dotnet build EventParkingReservationSystem.sln
```

Step 6 - Create or update the database

From the solution folder, apply the Entity Framework Core migrations to the configured EventParkingReservationDb database.

```
dotnet ef database update --project EventParking.DataAccess --startup-project EventParking.Api
```

Continue Running the Project

Step 7 - Run the backend API

In Visual Studio, set EventParking.Api as the startup project and run the HTTPS profile. Swagger should open automatically. The current HTTPS development URL is:

```
https://localhost:7066/swagger
```

Step 8 - Run the frontend

Open EventParkingReservationSystem\frontend in Visual Studio Code. Right-click index.html and select Open with Live Server. Keep the backend API running while using the frontend.

Step 9 - Open the application

The Live Server URL is normally similar to the following. The exact port can differ if Live Server is configured differently.

```
http://127.0.0.1:5500/EventParkingReservationSystem/frontend/index.html
```

Step 10 - Login using one of the seeded accounts

When the API starts in Development mode, the project seeds a demo Administrator account and a demo Customer account. Use the credentials below.

Login Credentials

Role	Username / Email	Password	Access
Administrator	admin@eventparking.local	Admin@12345	Admin Dashboard
Customer	customer@eventparking.local	Customer@12345	Customer Features
